Psychometric Assessment Report

Comprehensive Analysis & Guidance

Prepared For:

Rohit Sharma

St. Xavier Sr.Sec. School

Class: 10 | Section: A

Roll No: 1

Test Date: February 23, 2026

Report Overview

Test Type: SENIOR PSYCHOMETRIC

Status: Completed Successfully

This report provides a detailed analysis of your psychometric profile, covering Personality, Learning Orientation, Aptitude, and Motivation. Based on these factors, we have curated career suggestions that align with your natural strengths.

Note: We detected a balanced profile in some areas (tie scenario). The recommendations below consider multiple dominant traits to give you a broader perspective.

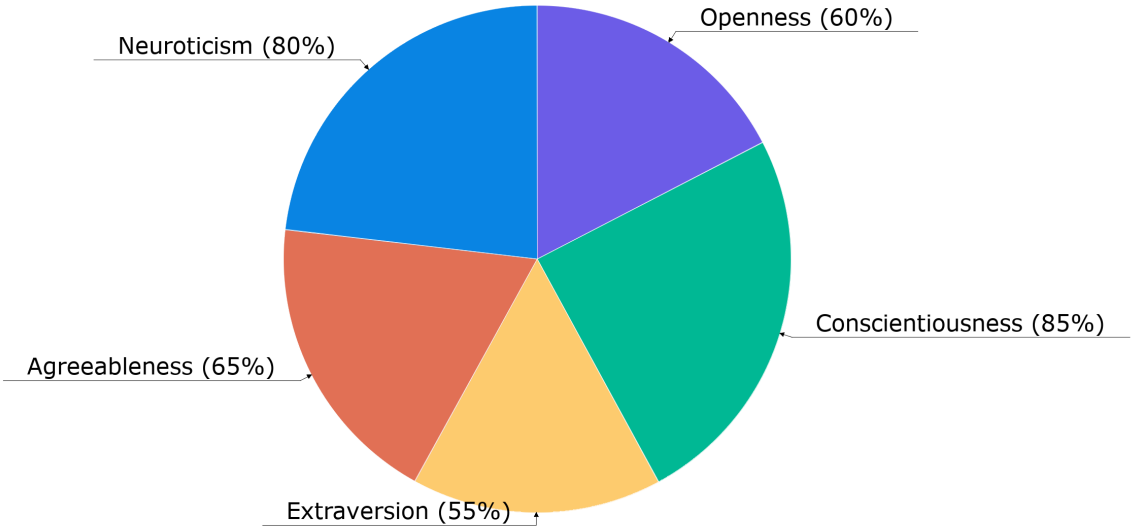
Your Core Profile

Based on your responses, here are your dominant traits in each category:

Category	Dominant Trait(s)
Personality	Conscientiousness
Orientation	Analytical
Aptitude	Logical
Motivation	Leadership, Creativity

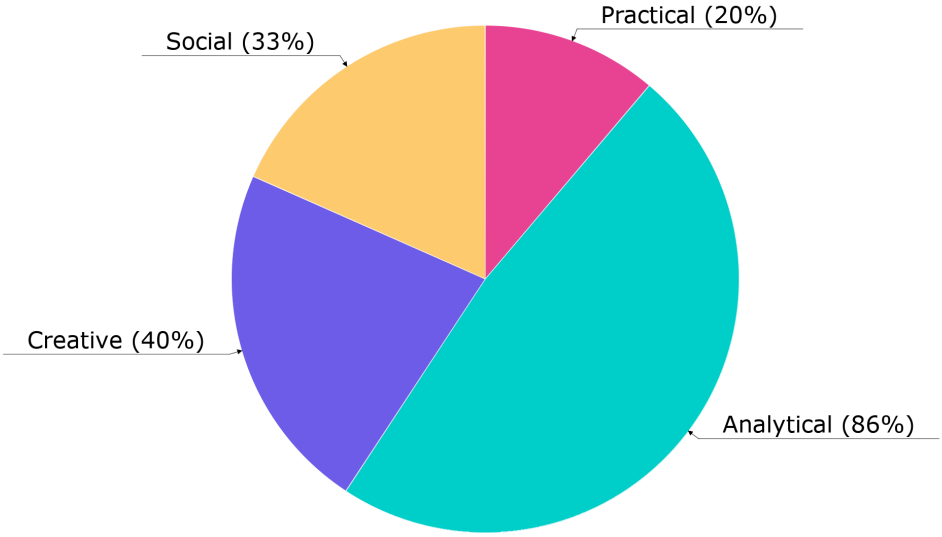
Personality
Orientation
Aptitude
Motivation

Detailed Subsection Analysis : Personality



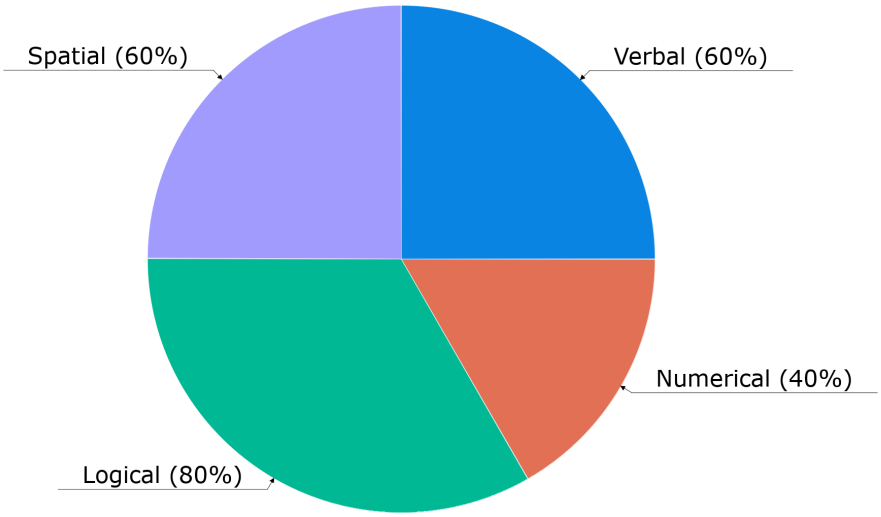
Trait	Description
Openness	Openness means how curious you are about new ideas, experiences, and learning new things. Students high in openness enjoy creativity, imagination, and exploring different perspectives.
Agreeableness	Agreeableness shows how kind, cooperative, and understanding you are with others. Students high in agreeableness are supportive, friendly, and good team players.
Conscientiousness	Conscientiousness means how responsible, organized, and disciplined you are. Students high in this trait complete assignments on time and stay focused on goals.
Extraversion	Extraversion shows how energetic and social you are. Students high in extraversion enjoy group activities, speaking up, and interacting with others.
Neuroticism	Neuroticism measures how emotionally sensitive or reactive you are. Students with higher levels may feel stress or worry more easily.

Detailed Subsection Analysis : Orientation



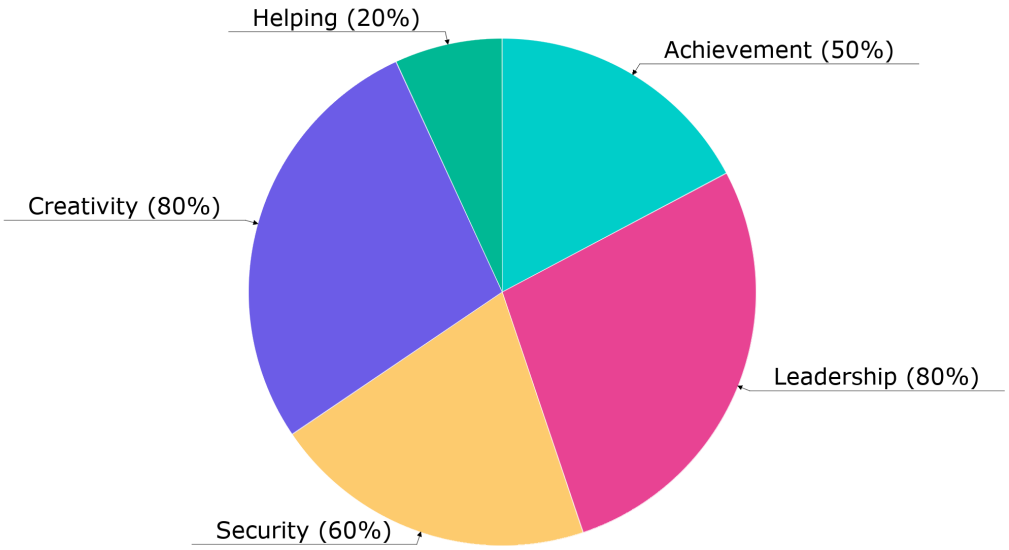
Trait	Description
Creative Orientation	Creative orientation means you enjoy imagination, designing, storytelling, art, or thinking differently.
Practical Orientation	Practical orientation means you like real-world tasks, hands-on work, and solving everyday problems.
Social Orientation	Social orientation means you enjoy helping, teaching, or interacting with people.
Analytical Orientation	Analytical orientation means you enjoy thinking deeply, solving puzzles, and understanding how things work.

Detailed Subsection Analysis : Aptitude



Trait	Description
Logical Aptitude	Logical aptitude is your ability to think clearly, find patterns, and solve reasoning problems.
Spatial Aptitude	Spatial aptitude is your ability to imagine shapes, designs, and how objects fit together.
Verbal Aptitude	Verbal aptitude is your ability to understand language, express ideas clearly, and communicate effectively.
Numerical Aptitude	Numerical aptitude is your ability to work with numbers, calculations, and data.

Detailed Subsection Analysis : Motivation



Trait	Description
Achievement Motivation	Achievement motivation means you like setting goals and working hard to succeed.
Leadership Motivation	Leadership motivation means you like guiding others and taking responsibility in group tasks.
Helping Motivation	Helping motivation means you feel happy when you support or assist others.
Creativity Motivation	Creativity motivation means you enjoy making new ideas, designs, or solutions.
Security Motivation	Security motivation means you prefer stability, clear plans, and safe choices.

Career & Stream Recommendations

Based on the combination of your profiles, we have identified the following career paths that would be a strong fit for you.

Option 1

Profile Snapshot

Learning Orientation: Analytical.

Personality: Conscientiousness (Organized, disciplined, reliable and goal-oriented.).

Dominant Aptitude: Logical.

Interest/Motivation: Creativity.

Carrier Match With:

Science (STEM) | Data Science | Research | Computer Science | Mathematics | Software Engineering | Accountancy

Suggested Subjects:

Mathematics | Physics | Computer Science | Logic | Business Studies

Strengths:

- Reliability
- Attention to detail
- Consistency
- Strong pattern recognition and deductive reasoning.

Areas to Improve:

- Flexibility
- Creative risk-taking
- Delegation
- Stress management

Option 2

Profile Snapshot

Learning Orientation: Analytical.

Personality: Conscientiousness (Organized, disciplined, reliable and goal-oriented.).

Dominant Aptitude: Logical.

Interest/Motivation: Leadership.

Carrier Match With:

Science (STEM) | Data Science | Research | Computer Science | Mathematics | Software Engineering | Accountancy

Suggested Subjects:

Mathematics | Physics | Computer Science | Logic | Business Studies

Strengths:

- Reliability
- Attention to detail
- Consistency
- Strong pattern recognition and deductive reasoning.

Areas to Improve:

- Flexibility
- Creative risk-taking
- Delegation
- Stress management

Detailed Skill Analysis

A deeper look into your key strengths and areas for growth, with actionable steps for improvement.

AREAS TO IMPROVE & MASTER

Flexibility

Definition: The ability to adapt to changing schedules, subjects, and expectations.

How to Improve:

- Accept change
- Try alternate methods
- Stay open to feedback

Suggested Exercises:

- New learning styles
- Group rotations
- Reflection after change

Creative Risk-Taking

Definition: Trying new ideas, answers, or approaches without fear of failure.

How to Improve:

- Normalize mistakes
- Encourage curiosity
- Explore beyond syllabus

Suggested Exercises:

- Open-ended projects
- Idea-generation tasks
- Creativity challenges

Delegation

Definition: Sharing responsibilities during group work instead of doing everything alone.

How to Improve:

- Trust peers
- Assign roles
- Follow up respectfully

Suggested Exercises:

- Group leadership tasks
- Role allocation games
- Team reflections

Stress management

Definition: Handling exam pressure, expectations, and emotions in a healthy way.

How to Improve:

- Normalize stress
- Build healthy routines
- Talk about emotions

Suggested Exercises:

- Breathing techniques
- Physical activity
- Guided relaxation

YOUR STRENGTH BUILDERS

Strong pattern recognition and deductive reasoning.

The student excels at identifying logical sequences, trends, and relationships between concepts. This strength aids in solving complex problems, understanding scientific principles, and mastering mathematical concepts.
