Psychology | Sociology | Languages | Mathematics | Statistics | Economics | Media Studies | Business Studies | Psychology (intro)

Strengths:

- Communication
- Teamwork
- Enthusiasm
- Good at calculations, number sense and quantitative analysis.

Areas to Improve:

- Listening skills
- Focused solitary work
- Patience
- Stress management

Detailed Skill Analysis

A deeper look into your key strengths and areas for growth, with actionable steps for improvement.

YOUR STRENGTH BUILDERS

Communication Skills

Definition: The ability to clearly express thoughts, ask questions, and confidently speak in class and social settings.

How to Improve Further:

- Practice speaking instead of memorizing
- Learn basic structure: intro → point → example
- Ask questions without fear

Suggested Exercises:

- Daily 2-minute speaking practice
- Classroom debates
- Reading aloud to improve clarity

AREAS TO IMPROVE & MASTER

Listening Skills

Definition: The ability to fully pay attention to teachers, peers, and instructions without distraction, so learning and relationships improve.

How to Improve:

- Listen to understand, not just to reply
- Reduce multitasking while listening
- Clarify doubts instead of assuming

Suggested Exercises:

- Paraphrase what the teacher said
- Active listening role-plays
- Note-taking during discussions

Focused Solitary Work

Definition: The ability to study independently with concentration and minimal distractions.

How to Improve:

- Build a distraction-free study space
- Practice deep focus sessions
- Avoid constant checking of phone

Suggested Exercises:

- 25–40 min deep study blocks
- Single-task assignments
- Focus stamina challenges

Patience

Definition: The ability to tolerate delays, learning curves, and challenges without frustration.

How to Improve:

- Accept slow progress
- Delay instant gratification
- Practice emotional regulation

Suggested Exercises:

- Long-term projects
- Mindfulness practices
- Reflective journaling

Stress Management & Mental Well-Being

Definition: Handling exam pressure, expectations, and emotions in a healthy way.

How to Improve:

- Normalize stress
- Build healthy routines
- Talk about emotions

Suggested Exercises:

- Breathing techniques
- Physical activity
- Guided relaxation
